**Our commitment to acting honestly,
with integrity, and always with clients'
best interests at heart, is fundamental
to everything we do.**

About —

Who we are

Our mission

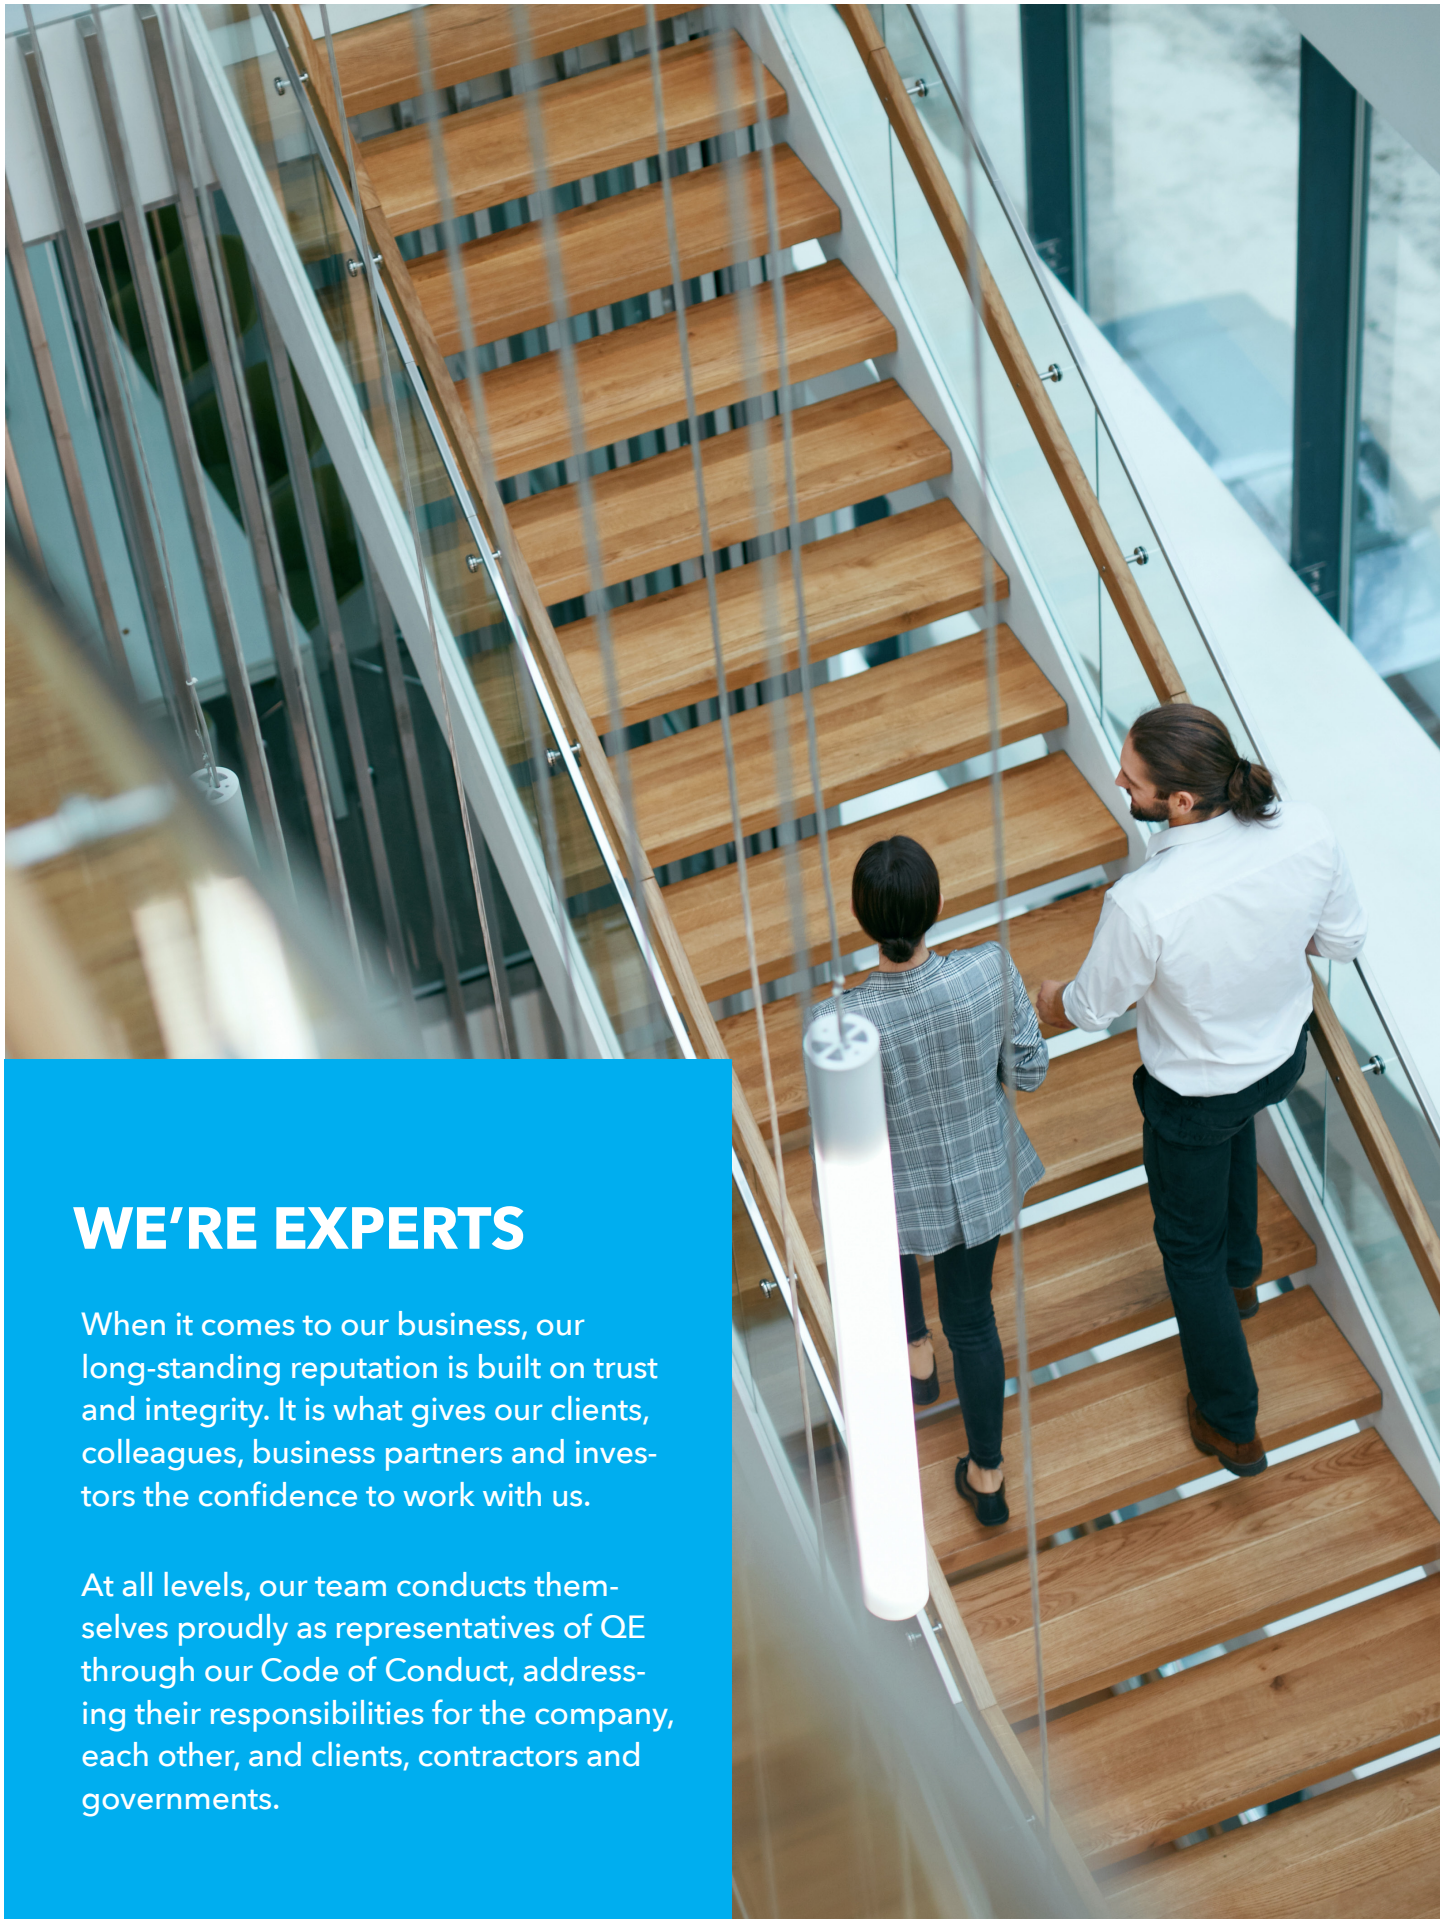

Helping oil and gas organizations capture value through operational improvements and digital transformations

To help our clients keep up, we leverage our expertise in developing new business models, transformational strategies, digital and operational approaches, and cost reduction programs—initiatives that deliver real value in the oil and gas industry.

Our Expertise

Our experts bring deep industry and functional expertise and a range of perspectives that question the status quo and spark change.

We work in a uniquely collaborative model across the company and throughout all levels of the oil and gas organizations, fueled by the goal of helping our clients thrive and enabling them to make the world a better place.

WE'RE EXPERTS

When it comes to our business, our long-standing reputation is built on trust and integrity. It is what gives our clients, colleagues, business partners and investors the confidence to work with us.

At all levels, our team conducts themselves proudly as representatives of QE through our Code of Conduct, addressing their responsibilities for the company, each other, and clients, contractors and governments.

Our Solutions

What we do
Our Solutions

Digital Transformation in Oil and Gas

Digital transformation involves integrating digital technologies and solutions into every area of a business.

This is as much a cultural change as a technological one as it requires organizations to make fundamental shifts in the ways they operate and how they deliver customer experiences and benefits.

Digital solutions also help to augment the workforce and can lead to business process and business model transformation.
